Colortrac

The right software for in-house scanning

SmartWorks TOUCH provides the functionality you need through an easy to use single touchscreen interface.
It is the easiest way to manage large format scanning, copying and printing.

Helping you capture, enhance, share, copy and preserve large format digital information

Specifications

SmartWorks TOUCH operation is based around the document type. With this software you can scan, copy, print or email with full image preview and edit control. An efficient, single screen interface groups all controls and scanner information in one place. Use advanced two-finger pinch and flick gestures for zoom, image pan and parameter select on supported touch compatible monitors.

SmartWorks TOUCH is available in two eddition. One provided for free with SC Xpress and Gx+ scanners and one designed for professional MFP.

SmartWorks TOUCH	SmartWorks TOUCH MFP
