# HOW TO CREATE
A COMPELLING POSTER

Est. 1991
DESIGNSUPPLY
supporting creativity

Canon's imagePROGRAF TM Series of multifunction and single function large format printers come with all the tools you need to easily create compelling posters in–house.

FREE LAYOUT PLUS

NEW

Anyone can create engaging large-format posters using **Free Layout Plus** software, which offers a range of handy features:

Easy layout (Office app)

Free Layout
Freely arrange originals from various applications on a page before printing.

Folded Poster
Any two pages can easily be arranged to be back-to-back when folded over after printing. This is an ideal solution for creating 2-sided promotional posters that can be hung from the ceiling, e.g. in retail stores.

Tiling
Tiling is an easy to set up solution that enables you to create extra-large posters (larger than the printer width) by combining several sheets, each showing part of a single image.
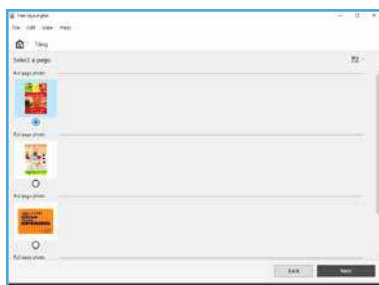

Standard-size layout
Original images from various applications can be printed at standard sizes or to fit the roll width. For optimum efficiency, you can adjust details such as image layout, position on a roll, and size while previewing your changes in real time.
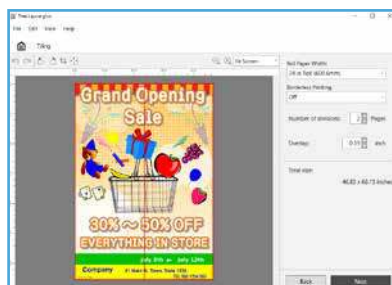

## FOCUS ON TILING

Tiling: Page Selection Screen

Tiling: Edit Screen

Tiling: Print settings

Select the poster to print

Edit tiling settings
