HP is leading the shift to more environmentally sustainable printing

At HP we realise that the development of innovative solutions designed with the environment in mind is not an option – it's an imperative. That's why HP is committed to programmes that help reduce our ecological footprint and help our customers and partners reduce theirs. By developing high quality products, services and solutions designed with the environment in mind, HP is helping to lead global businesses toward a sustainable future.

HP "closed loop" recycling process

HP's "closed loop" recycling process for ink cartridges was the first of its kind in the industry. Today both HP ink and LaserJet toner cartridges are recycled through this breakthrough process.

Recycled plastics vs. virgin plastics (results from 1 year)

¹ Based on a 2010 life-cycle assessment (LCA) performed by Four Elements Consulting and commissioned by HP. The study compared the environmental impact of using polyethylene terephthalate plastic (PET) with the environmental impact of using recycled polyethylene terephthalate plastic to manufacture new Original HP cartridges.

² Calculated with the EPA Greenhouse Gas Equivalencies Calculator. For details, see epa.gov/cleanenergy/energy-resources/calculator.html

³ Based on average American consumption assuming 302 litres of water a day per person.

HP has produced more than 2.6 billion Original HP ink cartridges containing content from its "closed loop" recycling process. Even in one year we can make a meaningful difference.

628 million
ink and toner cartridges recycled since 1991

3 billion
plastic bottles kept out of landfills since 2005

29 million
recycled apparel hangers since 2013

Return large quantities of HP cartridges

This bulk collection service option is targeted at small and medium business enterprises and public sector customers who want to return 100 to 2000 HP ink cartridges and/or 15 to 30 HP LaserJet toner cartridges for recycling.
